

# Safety Checklist & Inspection

---

## EQUINE

- Has your equine received regular training and driving?
- Does your equine stand quietly until directed off?
- Have the teeth been checked for the acceptance of the bit?
- Are horseshoes secure and suitable to maintain footing?
- Can your equine remain at a safe distance behind others?
- Is your equine controllable in traffic and around other equine?

## VEHICLE

- Wheels checked to be in good condition
- Axles and 5<sup>th</sup> wheel inspected and lubricated
- Bolts, singletrees, shafts and poles checked for condition
- Shaft couplers and pole housing secure
- Size, weight and load appropriate for conditions

## HARNESS

- Checked for excessive wear and proper fit
- Bit fitted correctly and not of prohibited style
- Headstall complete with throat latch and brow band
- Reins connected to the bridle – no snaps

## DRIVER

- Can you manage your equine around unfamiliar equine?
- Did you inspect your outfit and equipment before driving off?
- Are you confident in your driving to participate in this event?
- Never remove bridle or reins while hooked to a vehicle
- Protective headgear (ASTM or SEI) proper fit is recommended
- Medical armband – properly displayed is recommended
